

# Fabrication Equipment

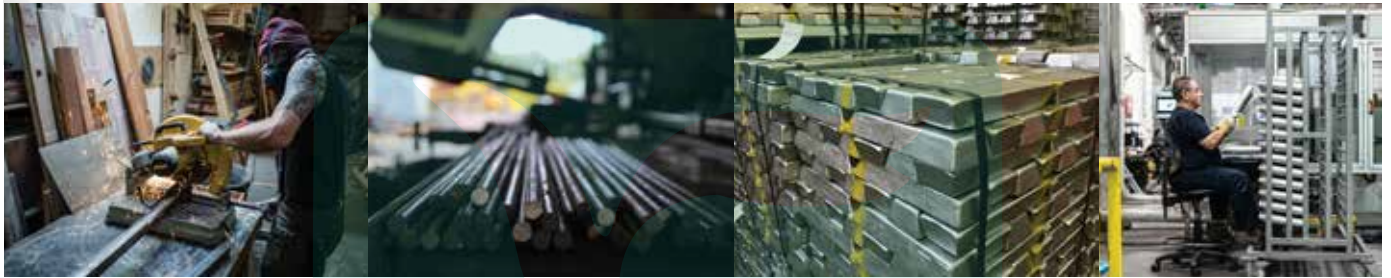

## WORK EFFICIENTLY WITH FABRICATION EQUIPMENT

Fabrication industries require the material handling operation of large items such as metal rods, sheets and blocks. Workers handling such heavy items tend put workers on risks of injuries, stress and fatality.

With fabrication equipment, items that are heavy and sharp can easily be transferred or handled and reduce ergonomic stress and increase occupational safety and health measures.

These specially designed fabrication equipment offers an alternate solution to assist workers in carrying out the tasks safely and efficiently.
